

Hope House School uses 'Cornerstones' as the basis of our curriculum up to key stage 3, outside of English and Maths. Cornerstones provides a varied and engaging range of topics across the primary curriculum. This is used across school with the exception of Post 16 and subjects are differentiated to suit pupils individual learning abilities and goals.

Cornerstones includes over 100 resourced projects from Nursery to Year 6. It is based on a comprehensive skills and knowledge progression framework and is expertly sequenced and interconnected. It provides pupils with the opportunity to participate in a wide variety of lessons including art and design, science, cooking, history, geography and expressive arts. Each lesson also factors in FBV and SMSC.
